## PERSONAL PROFILE

My favorite author, Jostein Gaarder, a Norwegian writer and philosopher, stated: *"When you realize there is something you don't understand, then you're generally on the right path to understanding all kinds of things."* Not only am I always enthusiastic about facing new challenges that force me to step outside my comfort zone, but also I am always looking forward to learning and developing new skills. I consider myself methodical and organized, persevering and energetic, and both flexible and always well disposed.

## EDUCATION

University of Southern California – Viterbi School of Engineering.

B.S. in Environmental Engineering (in progress).

Junior (Expected graduation – May 2021).
